Dear Mr Ransley,

RE: **ECOLOGICAL DATA SEARCH: BEECH PARISH**

Thank you for contacting us on 10 April 2018 expressing your interest in the above data search. Please find attached:

*information*

1. A map showing Sites of Importance for Nature Conservation (SINCs) and sites that appear on the Hampshire Ancient Woodland Inventory within Beech Parish. There are no other statutory designated sites within your search area other than those shown on the map attached.
2. A table listing the SINCs within your area of interest and their qualifying criteria.
3. A table detailing any protected and notable species currently on the HBIC database found within the vicinity of your see details on tab 'Bespoke' search area, please contact HBIC if further details are required for any of these records.
4. A table detailing any invasive non-native species currently on the HBIC database found within the vicinity of your see details on tab 'Bespoke' search area. Please contact HBIC if further details are required for any of these records.
5. A map showing Priority Habitat information within your see details on tab 'Bespoke' area of interest. Click here for the [legend](#)
6. A map showing Broad Habitat information within your see details on tab 'Bespoke' area of interest. Click here for the [legend](#)

*about*

*Hampshire's*

*wildlife*

Please note the following points:

- The attached maps contain some areas with no designation. This may be due to the fact that we currently do not hold any ecological survey

information on these areas of land. It should not be taken to mean that there is no ecological interest present.

- The boundaries for statutory sites have been provided to HBIC, by Natural England, as digital data. The digital data is indicative not definitive. Paper maps produced by Natural England at the time the sites were designated show the official site boundaries.
- To view the designation criteria for Sites of Importance for Nature Conservation in Hampshire please follow this link: [Criteria for SINCs in Hampshire](#)
- HBIC do not currently hold species information for certain taxonomic groups. The main datasets which have been included are listed at the top of any species list provided. If you need to confirm how comprehensive the provided records are, please contact HBIC.
- The Hampshire Inventory of Ancient Woodland is a provisional inventory that was published in 1995 by Hampshire County Council on behalf of English Nature (as Natural England were previously known). Sites that appear on the Inventory are over 2 hectares and include ancient semi-natural woodland and ancient replanted woodland.
- The location of species records are based on [Ordnance Survey National Grid References](#), click here to view an explanatory note on this system.
- The data supplied to you is subject to our [Data Users Declaration](#) (click to view) which you read and agreed to when you submitted your data request form.
- Our [Hampshire County Recorders](#) (click here to view details) would be very grateful for copies of any species records you make in Hampshire, just add your sightings directly onto Living record [www.Livingrecord.net](http://www.Livingrecord.net) where they will be picked up.
- The caveats and statuses of each Priority Habitat are explained in the comments and notes in 'Table 1 Priority Habitats in Hampshire' on page 7 in the [Annual Monitoring Report](#).

## Protected and Notable Species Records

Search Area: Within Beech Parish

Date: 24/04/2018

HBIC Ref: 7576

See this [Legislation Explanatory Document](#) for a document explaining notable species statuses and legislation.

HBIC has its own extensive database of habitat and higher plant data for the County. In addition, HBIC hold copies of datasets belonging to partner organisations. Through data exchange agreements with these organisations HBIC is provided with regular database updates and can supply species information on their behalf. HBIC currently holds copies of the following datasets:

- Botanical Society of Britain and Ireland's (BSBI) vascular plant database for Hampshire
- British Bryological Society (Mosses, Liverworts, Hornworts)
- Butterfly Conservation's butterfly and moth database for Hampshire
- Hampshire Ornithological Society (HOS) bird records
- Hampshire Bat Group (HBG) Records of bat roost visits and sightings
- Survey data administered by the Hampshire and Isle of Wight Wildlife Trust (HIWWT):
  - Monitoring Survey for the Nail Fungus *Poronia punctata*
  - Alien and Native Crayfish
- Data administered by the Hampshire and Isle of Wight Wildlife Trust on behalf of:
  - Hampshire Amphibian and Reptile Recording Network (HARRN)
  - Hampshire Mammal Group (HMG)
- Hampshire records from The Bees, Wasps and Ants Recording Society (BWARS)
- Hampshire records from National Stag Beetle Surveys and 'Great Stag Hunts' run by the Peoples Trust for Endangered Species (PTES)
- Hampshire Odonata records from The Dragonfly Recording Network, maintained by the British Dragonfly Society (BDS)
- Spider and Fungi records gleaned from collections housed and curated by the Hampshire Cultural Trust (HCT)
- Independent Hampshire Entomologist's records
- Earthworm Society of Britain's records

**It is important that these species recording groups (where relevant to the data provided) are acknowledged in any document produced by the data requester where data is incorporated into the document, as a matter of course.**

The following are protected and notable species records from the datasets **listed on the previous page**, within the search area recorded in the last 15 years. For plants this has been extended to 30 years, for bats there is no time restriction:

Taxon Name	Common Name	Status	Grid Ref.	GR_Blurred	Location	First Year	Last Year	No. of Records	Max Count

### Sensitive species

A small number of species are considered as sensitive by the relevant specialist species recording groups and will be indicated as such on all lists. Species may be considered sensitive for a variety of reasons. Location details for these records will not be disclosed unless the relevant species recording group has given their permission. Grid references may be altered to give a less precise position, this is indicated by the 'Grid Ref Blurred' column. Contact HBIC if further information is needed on these records.

### Further notes

- Records of species such as Box (*Buxus sempervirens*) may not appear in the table above because obviously planted specimens have been excluded from protected and notable species lists.
- Bluebell (*Hyacinthoides non-scripta*), Butchers Broom (*Ruscus aculeatus*) and Scots Pine (*Pinus sylvestris*) have a national status, however they are relatively common in Hampshire and so have been excluded from protected and notable species lists.
- Records of Hazel Dormice (*Muscardinus avellanarius*) include those where presence has been inferred from hazel nut evidence. Please contact HBIC if further details are required on these records.
- The location names, where shown, are the originals given by the recorders and may not match any formal name for the location or other colloquial names by which the location may also be known.
- The grid references, where shown, are the originals given by the recorders and may indicate the specific location of the species, a central grid reference representing a larger survey area, or a grid square.
- Where species have been deemed as 'sensitive' by the relevant specialist species recording group the location name will not be shown and the grid reference may have been altered to give a less precise position specified by the species recording group. This will be indicated by a 'yes' in the 'Grid Ref Blurred' column.
- Many of the records have been supplied by specialist species recording groups. Whilst every reasonable effort is made to validate information supplied to the Hampshire Biodiversity Information Centre the accuracy or comprehensiveness of this information cannot be guaranteed.
- Records do not necessarily represent evidence of breeding at a site; please contact HBIC if further details are required for any of these records.
- Whilst a species may have been recorded at a site, this does not indicate that the species is still present. Equally, the absence of a species from a site does not signify that it is absent, only that it has not been recorded, that the site has not been surveyed for this species, or that HBIC has not been informed of its presence.
- Quantities of '0' (zero) indicate that the species was 'present' but the number of individuals seen was not recorded.

- Negative sightings are not included in species lists.

*sharing information about Hampshire's wildlife*

The Hampshire Biodiversity Information Centre Partnership includes local authorities, government agencies, wildlife charities and biological recording groups.

**Invasive Non-native Species Records**

Search Area: Within Beech Parish

Date: 24/04/2018

HBIC Ref: 7576

HBIC has its own extensive database of habitat and higher plant data for the County. In addition, HBIC hold copies of datasets belonging to partner organisations. Through data exchange agreements with these organisations HBIC is provided with regular database updates and can supply species information on their behalf. HBIC currently holds copies of the following datasets:

- Botanical Society of Britain and Ireland's (BSBI) vascular plant database for Hampshire
- British Bryological Society (Mosses, Liverworts, Hornworts)
- Butterfly Conservation's butterfly and moth database for Hampshire
- Hampshire Ornithological Society (HOS) bird records
- Hampshire Bat Group (HBG) Records of bat roost visits and sightings
- Survey data administered by the Hampshire and Isle of Wight Wildlife Trust (HIWWT):
  - Monitoring Survey for the Nail Fungus *Poronia punctata*
  - Alien and Native Crayfish
- Data administered by the Hampshire and Isle of Wight Wildlife Trust on behalf of:
  - Hampshire Amphibian and Reptile Recording Network (HARRN)
  - Hampshire Mammal Group (HMG)
- Hampshire records from The Bees, Wasps and Ants Recording Society (BWARS)
- Hampshire records from National Stag Beetle Surveys and 'Great Stag Hunts' run by the Peoples Trust for Endangered Species (PTES)
- Hampshire Odonata records from The Dragonfly Recording Network, maintained by the British Dragonfly Society (BDS)
- Spider and Fungi records gleaned from collections housed and curated by the Hampshire Cultural Trust (HCT)
- Independent Hampshire Entomologist's records
- Earthworm Society of Britain's records

**It is important that these species recording groups (where relevant to the data provided) are acknowledged in any document produced by the data requester where data is incorporated into the document, as a matter of course.**

The following are Invasive Non-native species records from the datasets listed on the previous page within the search area recorded in the last 15 years. For plants this has been extended to 30 years:

#### Further notes

- The location names, where shown, are the originals given by the recorders and may not match any formal name for the location or other colloquial names by which the location may also be known.
- The grid references, where shown, are the originals given by the recorders and may indicate the specific location of the species, a central grid reference representing a larger survey area, or a grid square.
- Many of the records have been supplied by specialist species recording groups. Whilst every reasonable effort is made to validate information supplied to the Hampshire Biodiversity Information Centre the accuracy or comprehensiveness of this information cannot be guaranteed.
- Records do not necessarily represent evidence of breeding at a site; please contact HBIC if further details are required for any of these records.
- Whilst a species may have been recorded at a site, this does not indicate that the species is still present. Equally, the absence of a species from a site does not signify that it is absent, only that it has not been recorded, that the site has not been surveyed for this species, or that HBIC has not been informed of its presence.
- Negative sightings are not included in species lists.

#### Status codes and abbreviations:

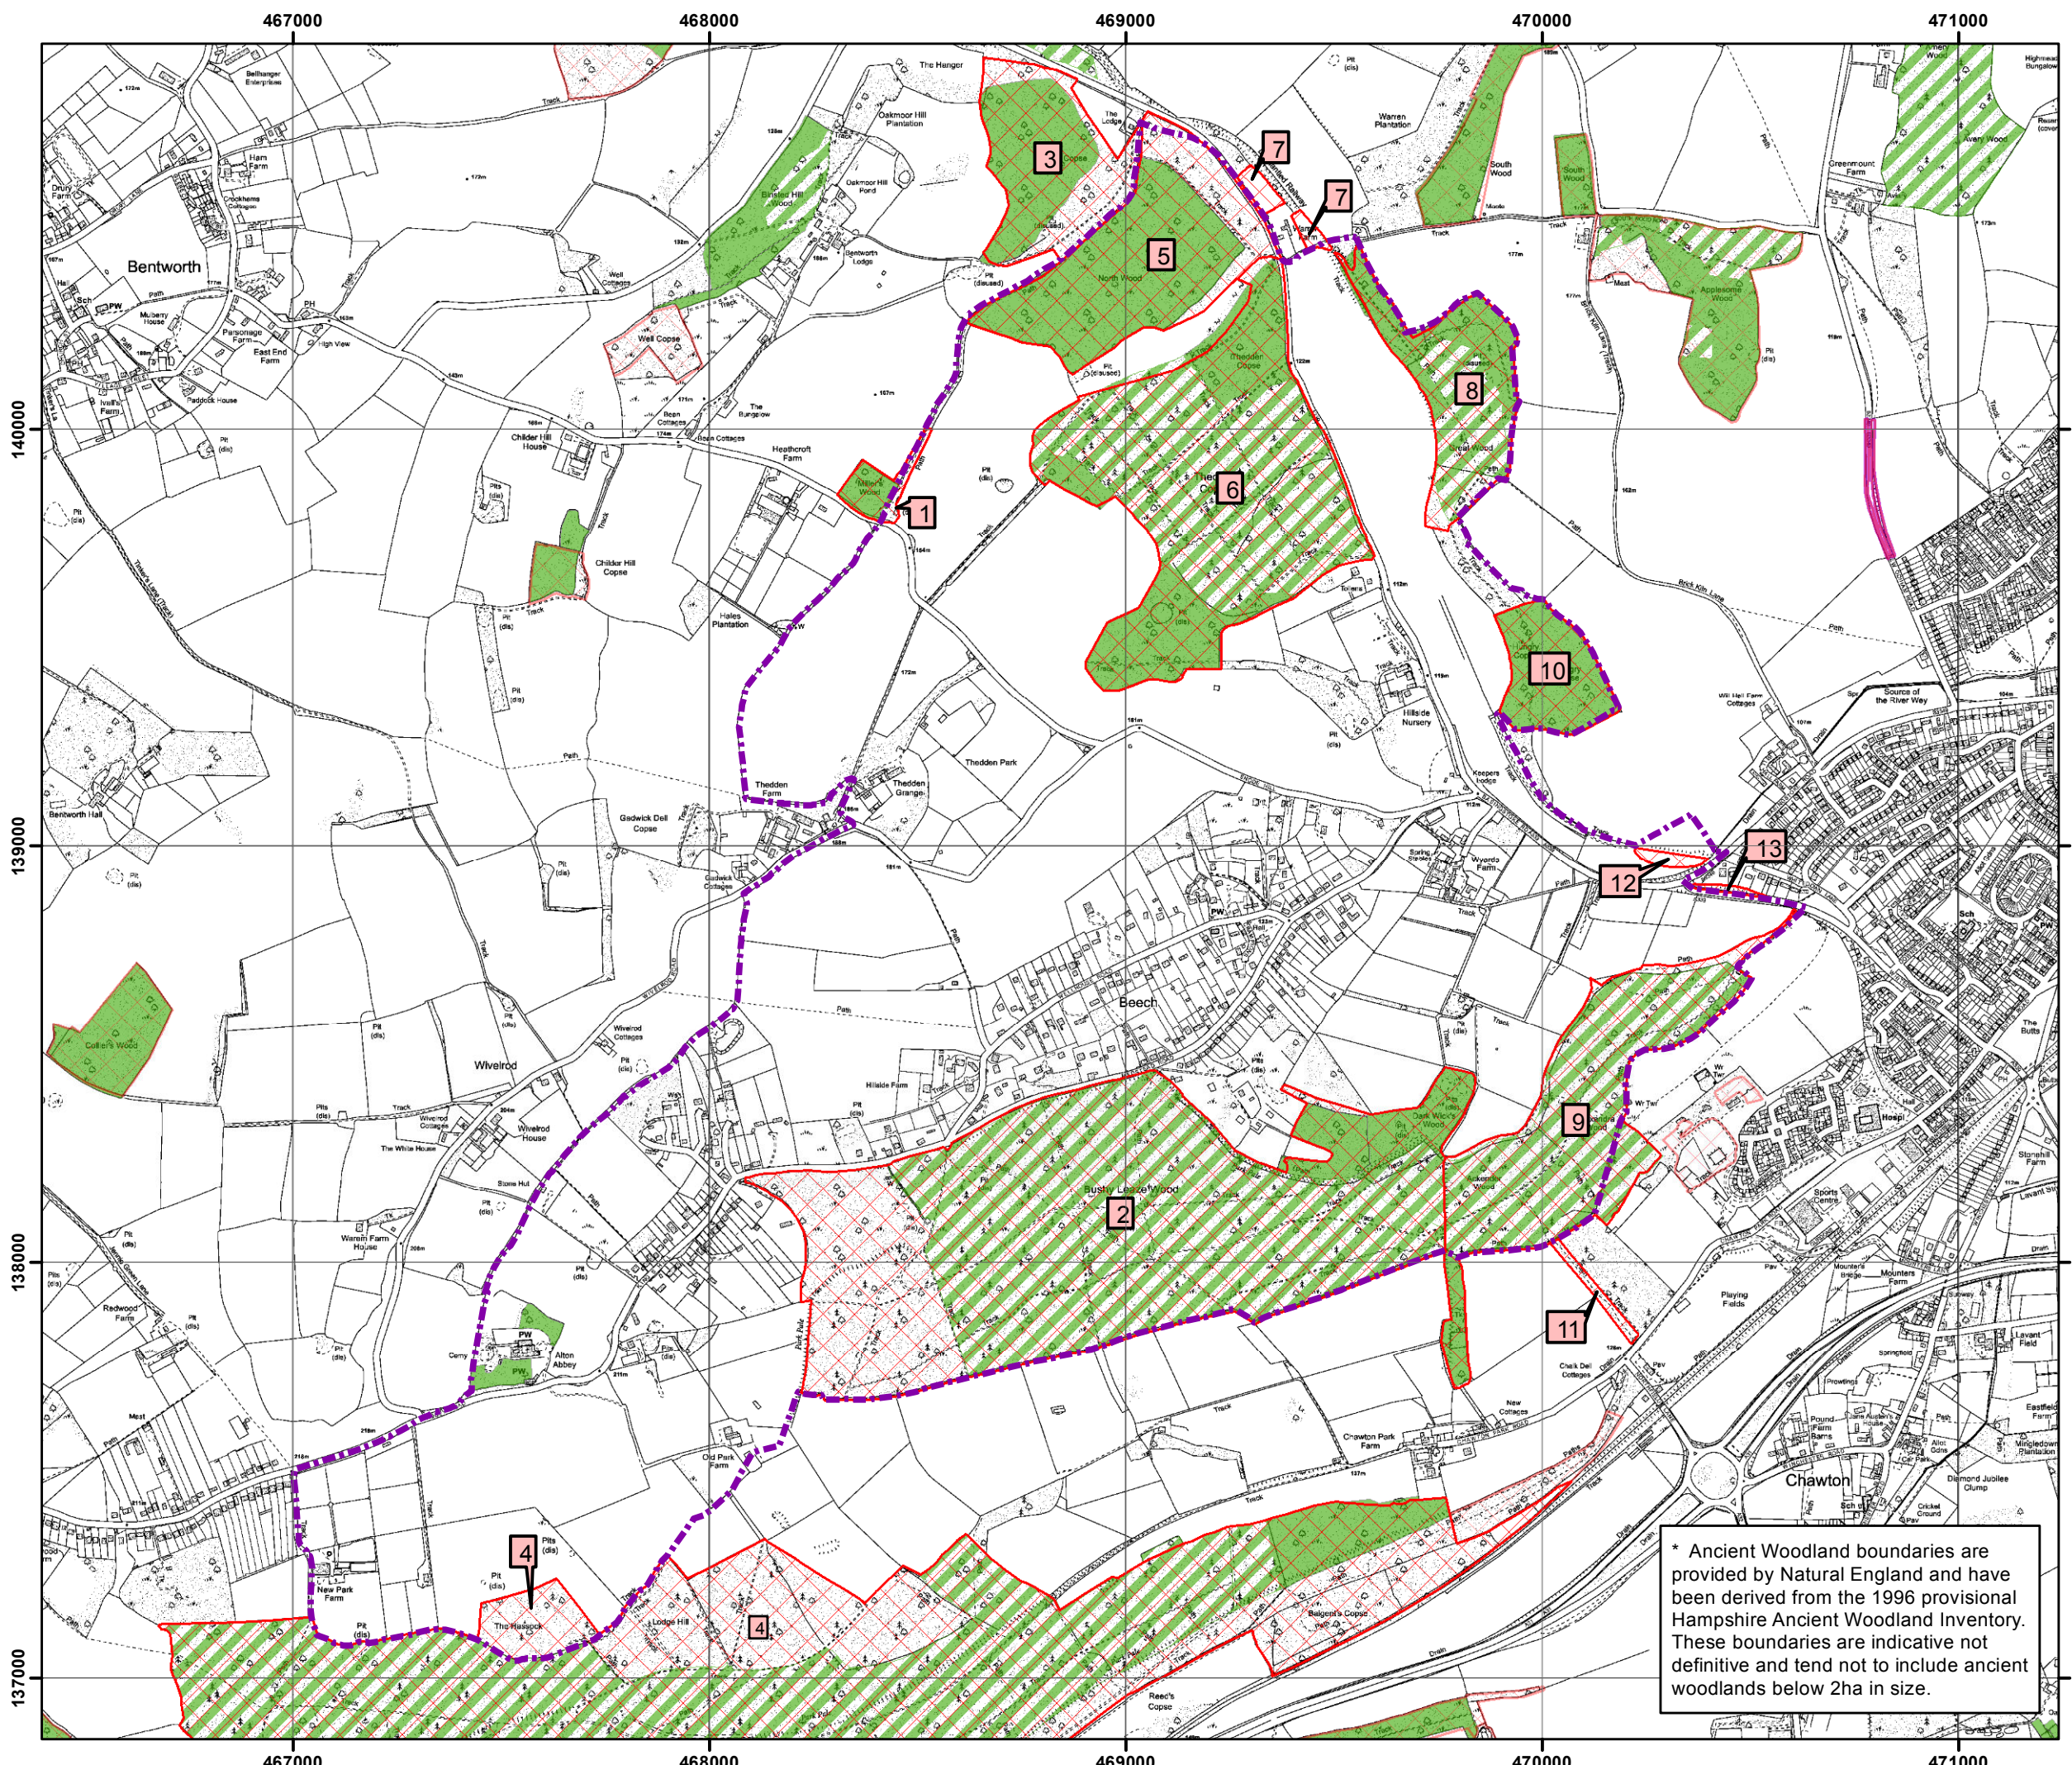

<b>IAS_EU</b>	Listed in the <a href="#">List of invasive alien species of union concern</a> More information can be found here- <a href="http://ec.europa.eu/environment/nature/invasivealien/index_en.htm">http://ec.europa.eu/environment/nature/invasivealien/index_en.htm</a>
<b>NNS_Port</b>	Listed in The Non-native Species Secretariat, Non-native Species Information Portal <a href="http://www.nonnativespecies.org/factsheet/index.cfm">http://www.nonnativespecies.org/factsheet/index.cfm</a>
<b>WaCA9_1</b>	Listed in the Wildlife and Countryside Act Schedule 9 Part 1 <a href="http://www.legislation.gov.uk/ukpga/1981/69/schedule/9">http://www.legislation.gov.uk/ukpga/1981/69/schedule/9</a> with the year the species was listed.
<b>WaCA9_2</b>	Listed in the Wildlife and Countryside Act Schedule 9 Part 2 <a href="http://www.legislation.gov.uk/ukpga/1981/69/schedule/9">http://www.legislation.gov.uk/ukpga/1981/69/schedule/9</a> with the year the species was listed.
<b>NE_Horizon</b>	Listed in the Natural England - <a href="#">Horizon scanning for new invasive non-native animal species in England</a> Only species with the categories 'A, Black List' OR 'B, Watch List' were used.
<b>Plantlife</b>	Listed in the Plantlife list: <a href="#">Here today, here tomorrow? Horizon scanning for invasive non-native plants</a> Only species with the categories 'Critical' OR 'Moderate Risk' OR 'Urgent' were used.
<b>EAList</b>	Listed in the MOA between EA and HBIC.

## Legend for UK Broad and Priority Habitats

### Broad Habitats

	Acid grassland
	Arable and horticulture
	Bog
	Boundary and linear features
	Bracken
	Broadleaved, mixed, and yew woodland
	Built-up areas and gardens
	Calcareous grassland
	Coniferous woodland
	Dwarf shrub heath
	Fen, marsh and swamp
	Improved grassland
	Inland rock
	Inshore sublittoral rock
	Inshore sublittoral sediment
	Littoral Rock
	Littoral Sediment
	Neutral grassland
	Rivers and streams
	Standing open water and canals
	Supralittoral Rock
	Supralittoral Sediment
	Unidentified habitat
	Unidentified water

### Priority Habitats

	Arable Field Margins
	Coastal Saltmarsh
	Coastal Sand Dunes
	Coastal Vegetated Shingle
	Coastal and Floodplain Grazing Marsh
	Eutrophic Standing Waters
	Hedgerows
	Intertidal Mudflats
	Lowland Beech and Yew Woodland
	Lowland Calcareous Grassland
	Lowland Dry Acid Grassland
	Lowland Fens
	Lowland Heathland
	Lowland Meadows
	Lowland Mixed Deciduous Woodland
	Maritime Cliff and Slopes
	Ponds
	Purple Moor Grass and Rush Pastures
	Reedbeds
	Rivers
	Saline Lagoons
	Seagrass Beds
	Traditional Orchards
	Wet Woodland
	Wood-Pasture and Parkland
