Policy BL19 ENHANCE OPPORTUNITIES FOR LOCAL EMPLOYMENT

Part B – Supporting New Employment

We support the identification and protection of the existing employment areas, in particular Passfield Mill Business Park. However part B should be more explicit in stating that new employment floorspace will be supported at the identified existing employment areas. As currently worded the policy only supports expansion of existing employment “premises” which suggests just the existing buildings within those identified employment areas. The policy should also support the expansion of the existing identified employments area to provide additional employment floorspace.

The suggested policy wording is as follows

B. Proposals for Class B uses to expand **the existing identified employment areas(in figures 28 and 29)** and existing employment premises **within these areas**, and/ or provide start-up business space – including office/workshop space and start-up units on flexible terms, shared space, and a business hub - will be supported, provided that:
